TECHNICAL SKILLS

Programming Languages

- C
- C++
- Python

Core Subjects

- Object-Oriented Programming (OOP)
- Data Structures & Algorithms (Basic)
- Database Management Systems (Learning)

Soft Skills

- Problem Solving
- Analytical Thinking
- Teamwork
- Adaptability
- Quick Learning

LANGUAGES

- English
- Tamil

PROFESSIONAL SUMMARY

Enthusiastic Artificial Intelligence and Data Science undergraduate with a strong foundation in programming and problem-solving. Proficient in C, C++, and Python, with knowledge of Object-Oriented Programming and basic Data Structures & Algorithms. Currently expanding expertise in Database Management Systems (DBMS). Passionate about building AI-powered solutions and collaborating on innovative software projects.

EDUCATION

Bachelor of Technology (B.Tech)
Artificial Intelligence & Data Science

PROJECT

CodePulse – AI-Driven Developer Estimation System

Role: Team Member

Project Overview:

CodePulse is an AI-powered platform designed to predict sprint outcomes and estimate developer performance using project metrics. The system assists software teams in identifying potential risks, improving sprint planning, and enabling data-driven project management.

Key Contributions:

- Assisted in designing an AI-based estimation system.
- Worked collaboratively on project development and presentation.
- Contributed to planning and feature discussions.
- Helped demonstrate the project's practical applications during presentations.

ACHIEVEMENTS

- Participated in Nimirndhu Nill 2026.
- Successfully presented the CodePulse – AI-Driven Developer Estimation System.
- Continuously improving programming and software development skills through academic learning and personal practice.

CAREER OBJECTIVE

To secure an internship or entry-level software development opportunity where I can apply my programming knowledge, strengthen my technical skills, and contribute to innovative projects while continuously learning emerging technologies in Artificial Intelligence and Software Engineering.
