EDUCATION

2024 - Present

SRI VENKATESWARA COLLEGE OF
ENGINEERING (SVCE)

- B.Tech – Artificial Intelligence & Data Science

SKILLS

- Python
- SQL
- Data Analytics
- Machine Learning Basics
- AI Automation
- Power BI
- NLP Basics
- Pandas
- Numpy
- Problem Solving
- Data Structures
- MongoDB
- Node
- Express

PROFILE

“Artificial Intelligence and Data Science student at Sri Venkateswara College of Engineering with good Software Development skills, MERN Stack, Python and MySQL. Passionate about AI-driven solutions, cybersecurity, and building efficient user-focused applications. Experience in frontend development, data structures, problem solving using academic and real-world projects. Fast learner, team player, adaptable and passionate about new technologies in the IT field.

PROJECTS

AI Agent for Government E-Seva Services

- Built an AI-powered assistant to simplify access to government E-Seva services and automate user guidance.
- Implemented conversational interaction features for handling service-related queries and workflow assistance.
- Tech Stack** : Python ,Next js , Tailwind CSS, LangChain, OpenAI

AVisitor Intelligence & Context-Aware Customer Engagement Platform

- Developed an AI-powered visitor intelligence and context-aware customer engagement platform that analyzes real-time visitor behavior to understand user intent and buyer state.
- Implemented real-time behavioral tracking, identity resolution, buyer-state modeling, AI-driven decision systems, RAG-based intelligence, and multi-agent conversational workflows using React, Node.js, Python, Flask, Postgre , and AI/ML technologies.

HACKATHONS & COMPETITIONS

- Participated in 10+ Hackathons including SIH 2025
- Participated in hackathons conducted by IIT Delhi, IIIT Bhubaneswar, Anna University, CIT Chennai, and SVCE Actively involved in problem-solving, team collaboration, and AI-based innovation challenge
