Summary

Final year Artificial Intelligence and Data Science student with intermediate proficiency in C, C++, and Python, and foundational knowledge of Cybersecurity, Artificial Intelligence, and Machine Learning. Passionate about web development and building responsive, user-centric applications while continuously enhancing technical skills to contribute effectively to real-world projects and organizational growth.

Skills

Programming Languages: C, C++, Python

Web Technologies: HTML, CSS, JavaScript

Data & Tools: Power BI, MySQL, MS Excel, Burp Suite

Core Areas: Web Application Development, Cybersecurity, Machine Learning

Education

Sri Venkateswara College of Engineering

2023 – 2027

B.Tech in Artificial Intelligence & Data Science

CGPA: 8.7 / 10

Loyola Matriculation Higher Secondary School

2023

Higher Secondary Certificate (HSC)

Score: 90%

Experience

Cybersecurity Intern

Dec 2025 – Jan 2026

Zero2Infinite

- Gained hands-on experience with cybersecurity tools such as **Burp Suite** for web application security testing and traffic analysis.
- Developed a strong understanding of common **network and web-based attacks** by solving practical labs on the PortSwigger platform.
- Performed **vulnerability analysis using Nessus scans** to identify, assess, and document security risks in systems and networks.

Projects

Railway Reservation System | *HTML, CSS, JavaScript, MySQL*

- Developed a web-based railway ticket booking application with secure user authentication and ticket reservation features.
- Integrated **MySQL** for efficient storage and management of user accounts, booking records, and transaction data.
- Designed user-friendly interfaces to improve usability and ensure smooth navigation across booking workflows.

Resview – Resume Analyzer | *HTML, Gemini API, Next.js, Tailwind CSS*

- Developed a web application that analyzes resumes against a target job role to evaluate skill alignment and ATS compatibility.
- Provided actionable recommendations on missing skills and profile improvements to enhance job-matching accuracy.
- Enabled users to upload resumes and receive instant feedback to improve employability outcomes.

Achievements

- **Runner-up, Makeathon 7.0** – Built a website to assist people with dyslexia in learning.
- **Winner, FODSE's Scraper's Soiree** – Scraped and analyzed data from five websites using **Selenium**, with data visualization and analysis performed using **Pandas** and **Matplotlib**.
