OBJECTIVE

Pre-final year Artificial Intelligence and Data Science student with intermediate proficiency in C, C++, and Python, and foundational knowledge of Cybersecurity, Artificial Intelligence, and Machine Learning. Passionate about web development and building responsive, user-centric applications while continuously enhancing technical skills to contribute effectively to real-world projects and organizational growth.

EDUCATION

B.Tech in Artificial Intelligence & Data Science , Sri Venkateswara College of Engineering Expected 2027
CGPA 6.950

Higher Secondary Certificate (HSC) , Bethel Matriculation Higher Secondary School 2023

SKILLS

Programming Languages	C, C++, Python
Data & Tools	Power BI, MySQL, MS Excel, Burp Suite
Core Areas	Web Application Development, Cybersecurity Fundamentals, Machine Learning

EXPERIENCE

Cybersecurity Intern Dec 2025 - Jan 2026
Zero2Infinite Royapuram, Chennai

- Gained hands-on experience with cybersecurity tools such as Burp Suite for web application security testing and traffic analysis.
- Developed a strong understanding of common network and web-based attacks by solving practical labs on the PortSwigger platform.
- Performed vulnerability analysis using Nessus scans to identify, assess, and document security risks in systems and networks.

PROJECTS

Railway Reservation System : Developed a web-based railway ticket booking application with secure user authentication and reliable ticket reservation features, integrated a MySQL database to efficiently manage user accounts, booking records and transaction data, and designed a clean, user-friendly interface to ensure smooth navigation and an improved overall booking experience.

Coderz.ai – AI Coding Chatbot : Built an AI-powered chatbot during the GDSC Hackathon to generate source code in multiple programming languages based on user input, and implemented intelligent debugging and error-explanation features to help developers understand issues clearly and resolve programming problems faster.

EXTRA-CURRICULAR ACTIVITIES

Fitness content creator on Instagram – create and publish fitness-focused and humorous short videos, and independently write scripts and concepts for each post, demonstrating creativity, communication skills, and strong interest in creative script writing, digital content creation and media technology .

ACHIEVEMENTS

- **Completed a mini project on a Railway Reservation System**, which received strong appreciation from faculty for its design, implementation, and overall project quality.
- **Secured 4th place** in an inter-college GDSC Hackathon by leading a team and successfully delivering a competitive and technically strong solution in a highly competitive environment.
