

GOKUL JAYANDAN R S

AI & DATA SCIENCE STUDENT | BUILDER • LEARNER • PROBLEM SOLVER

PROFILE

B.Tech Artificial Intelligence and Data Science student with a parallel BS in Data Science and Applications from IIT Madras. Passionate about AI, machine learning, and building real-world software solutions. Experienced in developing AI systems, fraud detection engines, and full-stack applications through hackathons and academic projects. Dedicated to continuous learning and delivering impact through technology.

EDUCATION

- B.Tech – Artificial Intelligence and Data Science 2025 – 2029
Sri Venkateswara College of Engineering, Chennai
CGPA: 8.51
- BS in Data Science and Applications (Online) 2025 – Present
Indian Institute of Technology Madras
- Higher Secondary (XII) – 97% 2023 – 2025
- Secondary School (X) – 95.4% 2022 – 2023

EXPERIENCE

- Programming Instructor (Intern) – CSC Pvt. Ltd. May 2025 – Aug 2025
 - Taught C, C++, Python, and SQL to first-year engineering students.
 - Conducted hands-on programming sessions and explained core programming concepts.
 - Completed the Honors Diploma in Computer Applications (HDCA) alongside instructional responsibilities.

PROJECTS

- Agentic Hybrid RAG System 2026
 - Built an agentic hybrid Retrieval-Augmented Generation system that integrates intelligent agent workflows with hybrid information retrieval.
 - Designed multi-step decision logic for query understanding, retrieval, reasoning, and response generation.
 - Implemented using Python, embeddings, and vector database for efficient knowledge retrieval and generation.
- Banking Fraud Engine – FinTech Hackathon 2026
 - Developed a fraud/risk detection engine for banking servers to identify suspicious transactions and high-risk activities.
 - Combined machine learning models with rule-based logic for real-time fraud assessment and risk classification.
 - Collaborated in a team to design, build, test, and present the solution at a FinTech hackathon.
- CodePulse – AI-Driven Developer Effort Estimation System 2025
24-Hour Hackathon Project
 - Built an AI-assisted system to estimate software development effort and task completion time.
 - Developed a React-based frontend integrated with backend services.
 - Collaborated in a team to design, develop, and present the solution within 24 hours.

LEADERSHIP & ACTIVITIES

- Technical Executive – Forum of Data Science Engineers (FODSE), SVCE 2026 – Present
 - Contribute to technical initiatives, workshops, and project activities.
 - Support planning and execution of events and collaborative learning programs.
- Machine Learning Member – Developer Student Community (DSC), SVCE 2026 – Present
 - Active member of the Machine Learning domain, collaborating on ML projects and learning initiatives.
 - Participate in technical sessions, discussions, and community-driven activities.

HACKATHONS & ACHIEVEMENTS

- Blueprints 2026 – Top 20 Team in a 24-hour intercollegiate hackathon; built CodePulse, an AI-driven effort estimation and developer intelligence system.
- Rota-TechX 2026 – Built a software solution in a 24-hour hackathon.
- Nimiridhu NII Hackathon Ideation Camp – Attended a EDII-TN's innovation camp focused on real-world a and problem-solving.
- Secured Winner in an ML hackathon; presented a paper: AI-Driven Decentralized Smart Agriculture System (Best Paper Recognition Award).

- github.com/GokulJayandan
- https://www.linkedin.com/in/gokul-jayandan-r-s-765538383
- Chennai, India

SKILLS

- Python
- JavaScript
- C++
- Java
- SQL

DEVELOPER TOOLS

- Git & GitHub
- VS Code
- Vite
- npm

AI TOOLS

- Codex
- Claude
- Stitch
- Antigravity

CORE SKILLS

- Prompt Engineering
- API Integration
- Version Control
- Team Collaboration
- Problem Solving
- Rapid Prototyping

LANGUAGES

- English
- Tamil

CERTIFICATIONS

- Honors Diploma in Computer Applications (HDCA) – Programming, CSC Pvt. Ltd.
