PROFESSIONAL SUMMARY

Aspiring Data Analyst skilled in Python, SQL, Power BI, Tableau, and feature engineering, with hands-on experience in predictive modeling and interactive dashboards. I translate complex data into actionable insights and have improved model accuracy and streamlined data workflows to support better decision-making. Eager to apply analytical and machine-learning techniques to drive measurable business impact.

EXPERIENCE

- DELLOITE, Data Analytics Virtual Intern**12/2025
 - Completed a Deloitte virtual job simulation focused on data analytics and forensic technology.
 - Built an interactive Tableau dashboard to communicate key findings to stakeholders.
 - Used Excel for data categorization and analysis to inform data-driven business strategies.
- MAIYYAM, Data Analyst Trainee**09/2025
 - Cleaned and transformed datasets using Excel, Power BI, and Python (Pandas).
 - Performed exploratory data analysis and created visualizations with Matplotlib to key trends and insights.
 - Built interactive Power BI dashboards to support data-driven decision making.

EDUCATION

- B.Tech, Artificial Intelligence And Data Science**09/2023 – Present | Sriperumbudur, Kanchipuram
Sri Venkateswara college Of Engineering, Sriperumbudur
(GPA: 8.61/10)
- Higher Secondary, Salem District Government Model School, Salem, Tamil Nadu**03/2023 | Salem, Tamil Nadu
(85.33%)

SKILLS

- Programming:** C | C++ | Python | Java
- Other Tools:** Power BI | MySQL | Tableau
- Domains:** Data Science | Machine Learning | Frontend
- Languages:** Tamil | English | Hindi | Kannada

CERTIFICATIONS

- Data Analysis with Python - IBM • Artificial Intelligence & Machine Learning - Infosys • Python for Data Science - IBM • Power BI Microsoft • SQL - Udemy • Diploma in C Programming - CSC

ACHIEVEMENTS

- All India Inter University - Bronze Medalist,, Anna University**09/05/2026
- State level "Gold Medal" at Wushu, TamilNadu Wushu Association**01/10/2022
- Finalist in "Icube-Innowel Hackathon" at SVCE**
Finalist for IOT Enabled Smart Car Parking System

PROJECTS

- Sales Forecasting Dashboard**09/2025
 - Created an interactive Power BI dashboard to visualize sales trends and forecast future revenue. Tech stack: Power BI, SQL.
 - Automated data refresh and integrated SQL queries, reducing manual reporting time by 40%.
- Quiz Application- Web-based Interactive Game**10/2025
 - Designed and developed a responsive, interactive quiz application with a clean and intuitive user interface. Tech stack: HTML, CSS, JavaScript.
 - Implemented dynamic question rendering and Applied CSS styling and animations for an engaging, cross-browser compatible user experience.
- Restaurant Data Analysis and Feature Engineering, Cognifyz Technologies**01/2026
 - Analyzed 9,551+ restaurant records using Python to extract insights on pricing, ratings, and service availability. Tech stack: Python, pandas, NumPy.
 - Evaluated the impact of table booking and online delivery on customer ratings through comparative and segmentation analysis.
 - Engineered ML-ready features (binary encoding, cuisine count, text-length metrics) to prepare the dataset for predictive modeling.
