ABOUT ME

I am Mukilash is a passionate and self-motivated learner with a strong interest in Data Science, Machine Learning, and Artificial Intelligence. Enthusiastic about transforming data into meaningful insights and developing intelligent, data-driven solutions to real-world challenges. Continuously enhancing technical skills in programming, data analysis, statistical modeling, and predictive analytics while staying up to date with the latest advancements in AI, data science, and emerging technologies. A quick learner with strong analytical, problem-solving, and teamwork abilities, committed to continuous learning and innovation

EDUCATION

Sri Venkateswara College of Engineering, Sriperumbudur, Tamil Nadu Bachelor of Technology in Artificial Intelligence & Data Science CGPA: 7.7/10.0	2024-2028
Adhiyaman Matric Hr. Sec. School, Uthangarai,Krishnagiri Higher Secondary (HSC): 89.5%	2023-2024
Adhiyaman Matric Hr. Sec. School, Uthangarai,Krishnagiri Secondary (SSLC): 88.4%	2021-2022

TECHNICAL SKILLS

- **Languages** Java, Python, C++, C
- **Databases** MySQL, MongoDB
- **Technologies** React.js, JS ,Flask
- **Tools & Platforms** Git, GitHub, Streamlit, VS Code
- **Core Concepts** DSA, ML, DBMS,SQL

PROJECTS

- **AI-Powered Government E-Seva Assistant**
Developed an AI-Powered Government E-Seva Assistant that helps citizens easily access and understand government services, schemes, and application procedures. Integrated NLP-based conversational assistance to provide information on eligibility, required documents, and application steps. Designed a user-friendly web interface to simplify service discovery and improve citizen support.
- **AI-Based Surplus Food Redistribution Platform**
Developed an AI-Based Surplus Food Redistribution Platform to connect hotels, restaurants, and food donors with NGOs and individuals in need, reducing food wastage. Implemented image-based food verification and location-based matching to identify and efficiently redistribute surplus food. Designed a user-friendly platform with real-time food listings, notifications, and map-based discovery to streamline the donation process.
- **AI-Powered Advertisement Generation System**
Developed an AI-Powered Advertisement Generation System that automates the creation of engaging advertisements from user-provided product or service details. Integrated Generative AI to generate creative ad copy, captions, and promotional content tailored to different audiences. Designed a user-friendly interface to streamline the advertising workflow and reduce the time required for content creation.

CERTIFICATIONS

- Gemini Certified Student
- Google Cloud - Introduction to Generative AI Studio
- Infosys - Programming in C
- HarvardX-Introduction to Programming with Python

ADDITIONAL INFORMATION

• BIS National Hackathon | 2nd Place | 2025

Secured 2nd Place for developing an AI-powered food redistribution ecosystem that intelligently identifies surplus food and facilitates its timely transfer to those in need. The platform combines AI-driven decision-making, location intelligence, and automated coordination to improve redistribution efficiency. The solution addresses food wastage at scale while promoting sustainable and socially responsible resource utilization.
