EXPERIENCE

Software Development Engineer Intern

[Tech Machers](#)

📅 March 2026 – August 2026 📍 Chennai, India

- Migrated enterprise-scale hospital websites from static implementations to Payload CMS.
- Developed reusable CMS block architecture using React, Next.js and TypeScript.
- Fixed routing, rendering and Payload CMS integration issues across multiple applications.
- Worked with Git-based collaborative development in an Agile environment.
- Technologies Used: React, Next.js, TypeScript, Payload CMS, Node.js, Docker, Git, REST APIs, Distributed

ACHIEVEMENTS

- [Smart India Hackathon Finalist 2024,2025.](#)
- [Infosys Hackathon Top 6 Team.](#)
- [D³ Fest State Winner , Fest National Finalist \(Top 10\).](#)
- Amazon ML Summer School (ongoing).
- [Google Summer of Code 2026 Proposal Contributor \(DeepChem\).](#)

TECHNICAL SKILLS

- **Programming Languages**
 - C++, Java, JavaScript, Python
- **Frameworks & Libraries**
 - HTML, CSS, SCSS, React, Nextjs, Nodejs
- **Databases**
 - SQL, NoSQL, PL/SQL, PostgreSQL, MongoDB
- **Course Subjects**
 - Operating Systems, Computer Networks, Object-Oriented Programming, Database Management System

RESEARCH PUBLICATIONS

- [Lightweight Post-Quantum Cryptography Framework for Secure IoT Communication using Lattice-Based Encryption and Error-Correcting Codes](#) – Research manuscript proposing a lightweight post-quantum security framework for resource-constrained IoT devices. Combines lattice-based cryptography with error-correcting codes to improve communication reliability and quantum resistance.

EDUCATION

B.Tech. (CSE) - 7.8 CGPA

Sri Venkateswara College of Engineering

📅 2023 – 2027 📍 Sriperumbudur, Tamil Nadu

HSC (12th Grade) - 86%, SSLC (10th Grade) - 100%

Govt Boys Higher Secondary School

📅 2020 – 2023 📍 cheyyar, Tamil Nadu

PROJECTS

[Tamil Historical Character Recognition System](#)

- Tech Stack: Python | PyTorch | OpenCV | OCR
- Developed an offline OCR pipeline for digitizing historical Tamil documents.
- Built an end-to-end document digitization pipeline for multilingual documents.
- Achieved over 95% Tamil and 98% English recognition accuracy.
- Optimized preprocessing and recognition for degraded historical manuscripts.

[Lightweight Post-Quantum Cryptography for IoT](#)

- Tech Stack: Python | ESP8266 | IoT | Cryptography | Error Correcting Codes
- Designed a lightweight post-quantum secure communication framework for resource-constrained IoT devices.
- Combined lattice-based cryptography with error-correcting codes for secure communication.

[Bus Route Finder](#)

- Tech Stack: Python | Graph Algorithms | Data Structures
- Developed a Python application to search and identify optimal bus routes between source and destination locations.
- Implemented route optimization algorithms to determine efficient travel paths and provide route information.

OTHER EXPERIENCE

- GenAI Trainer /AI-ML intern, Altruisty
- Web & Research ML Team Member, Know-I Club
- DeepChem Open Source Contributor (GSoC 2026 Proposal)
