PROFILE

Frontend developer currently learning backend development, working towards becoming a Full Stack Developer. Interested in AI automation and integrating intelligent features into web applications. Strong problem-solving skills with a passion for building scalable, user-focused solutions.

EDUCATION

Industry Ready Certification in Full-stack Development

Nxtwave Disruptive Technologies

04/2024 – Ongoing

B Tech (Bachelor of Technology) Artificial Intelligence and Data Science (AI & DS)

Sri Venkateswara College of Engineering, Kanchipuram

2023 – 2027

(8.6 CGPA)

Intermediate MPC

Isha Vidhya Matric. Hr. Sec. School, Kallakuruchi

2022 – 2023

(94.0%)

SKILLS

Frontend

HTML, CSS, Bootstrap, JavaScript, React.js

Backend

Python, Express, Node.js

Databases

SQLite

Other skills

C++, Flexbox, Java, OOPS

PROJECTS

AI Mock Interview Platform 📄

- Developed an AI-powered platform to simulate technical interviews and provide automated performance feedback.
- Integrated an in-browser coding environment using Monaco Editor for solving coding challenges.
- Implemented REST APIs, dynamic routing, and interactive interview features for a seamless user experience.

Technologies used: React.js, Vite, Node.js, Express.js, MongoDB, Gemini AI, Axios, Monaco Editor

Todos Application 📄

A task management solution, designed to make life easier.

- Streamlined task management through a combination of HTML, CSS, and Bootstrap for an intuitive interface.
- Seamless CRUD operations through JavaScript event listeners and dynamic UI updates.
- Secure task persistence with local storage methods, ensuring that your tasks are always available.

Technologies used: HTML, CSS, JS, Bootstrap

Wikipedia Search Application 📄

A custom wikipedia search application that provides a simplified and intuitive way for users to access and view relevant information. With the ability to easily search for and view curated results, users can dive deeper into their interests with just a click.

- Streamlined search results with HTML list elements, styled for a modern and user-friendly interface using CSS, Bootstrap and responsive design.
- Effortlessly access information with asynchronous fetch GET HTTP API calls and the option to open the desired result in a new tab for further exploration.

Technologies used: HTML, CSS, JS, REST API Calls, Bootstrap

CERTIFICATES

- AI Workflows and Automation Workshop using Make.com 📄
