TECHNICAL SKILLS

Programming Languages

- C
- C++

Web Technologies

- HTML (Learning)
- Canva Designing

Areas of Interest

- Machine Learning
- Artificial Intelligence
- Software Development

CERTIFICATIONS

- C Programming 101 (Nov 2025)
- Python – Pandas: Series & DataFrames (Apr 2026)
- Probability and Statistics using Python (On-going)
- AI: Concepts and Techniques (On-going NPTEL)
- Data Science for Engineers (On-going NPTEL)

LANGUAGES

- 🌐 English
- 🌐 Tamil
- 🌐 Telugu
- 🌐 Hindi (Basic)
- 🌐 Japanese (To Introduce myself)
- 🌐 Korean (To Introduce myself)

HOBBIES

- Music
- Writing Books
- Reading
- Researching

CAREER OBJECTIVE

Computer Science student passionate about Artificial Intelligence, Machine Learning, and Data Science, with a strong foundation in software engineering and algorithms. Seeking an internship or entry-level role to build predictive models and contribute to data-driven, real-world solutions.

EDUCATION

B.E. Computer Science and Engineering

Sri Venkateswara College of Engineering, Chennai

Expected Graduation: 2029

CGPA: 7.47

Higher Secondary Education

Vani Vidyalaya Senior Secondary and Junior College

Score: 71%

Secondary Education

Vani Vidyalaya Senior Secondary and Junior College

Score: 75%

PROJECTS & HACKATHON

Inventory Management System — C++ (On-Going)

Console-based inventory management system in C++17

- Designed and implemented an OOP inventory system with `Item` and `Inventory` classes, supporting CRUD operations, substring/category search, and low-stock reporting
- Built custom CSV-based persistence layer with automatic save-on-mutation and crash-safe ID recovery on restart
- Wrote a Makefile-driven build pipeline; compiled warning-free under `-Wall -Wextra` using modern C++ (STL containers, `std::optional`)

AI Text Summarizer — Python (On-Going)

CLI tool for automatic text summarization using LLM APIs

- Built a dual-engine summarizer integrating the Anthropic Claude API for abstractive summaries, with a hand-rolled offline extractive algorithm (frequency-based sentence scoring) as a dependency-free fallback
- Designed graceful degradation logic that auto-detects API key availability and falls back cleanly on network/auth failures, ensuring the tool never breaks for end users
- Supported flexible input methods (file, raw text, stdin) via an argparse-driven CLI

SOFT SKILLS

- Problem Solving
- Teamwork
- Communication
- Quick Learner
- Time Management
- Adaptability

ACHIEVEMENTS

- Completed C Programming course with strong fundamentals.
- Consistently enthusiastic about learning new technologies and tools.
