PROFILE SUMMARY

Artificial Intelligence and Data Science undergraduate with strong Python programming skills practical experience in machine learning and data analytics. Skilled in developing data-driven models and analytical solutions that deliver measurable performance improvements and business value.

INTERNSHIPS & EXPERIENCE

Cognifyz Technologies | Data Analysis Intern

Nov 2025 – Jan 2026

- Performed EDA on 9.5k+ records using Pandas. Executed data preprocessing across 21 structured variables. Built automated Jupyter-based preprocessing pipelines with statistical profiling and visualizations, reducing manual effort by 30%.

SkillCraft Technology | ML Intern

May 2025 – July 2025

- Built ML models using Python & TensorFlow and improved accuracy via feature engineering.
- Designed optimization algorithm reducing operational cost by 20%.
- Implemented regularization techniques and evaluated performance using precision, recall, F1-score, and ROC-AUC metrics to ensure model generalization.

PROJECTS

AI-Based Preventive Health Risk Stratification System

Oct 2025 – Jan 2026

- Built comparative ML models (LR, RF, XGBoost) for cardiovascular risk prediction.
- Integrated SHAP-based explainable AI for transparent feature interpretation.
- Developed probabilistic risk engine with Streamlit dashboard for real-time assessment.

YouTube Comment Sentiment Plugin (Chrome Extension)

Jun 2025 – Aug 2025

- Developed an ML pipeline using MLflow + DVC on AWS, enabling versioned sentiment experiments and scalable backend inference.
- Built a Chrome plugin that fetches 1k+ YouTube comments via API and delivers real-time sentiment visualizations (pie charts and distribution analytics).

Hand Gesture Recognition using ASL Alphabet Data

Feb 2025 – May 2025

- Developed and trained a Convolutional Neural Network (CNN) using TensorFlow and Keras, achieving 92% validation accuracy on ASL alphabet image classification.
- Implemented image preprocessing techniques such as grayscale conversion, normalization, and data augmentation, improving model performance by ~8%.

SKILLS

- Programming: Python, C/C++
- Libraries: NumPy, Pandas, Scikit-learn, TensorFlow
- Tools: Git, GitHub, AWS, OCI, MLflow, REST APIs, DVC
- Database: MySQL

ACHIEVEMENTS

- Finalist of Flinders University AI Competition 2026.
- Completed Oracle Cloud Infrastructure 2025 certified AI Foundations Associate.
- Scored 75% in NPTEL Cloud Computing certification by IIT.

EDUCATION

Sri Venkateswara College of Engineering, Sriperumbudur

2023 - 2027

B.Tech. Artificial Intelligence and Data Science

CGPA - 8.27
