PROFESSIONAL SUMMARY

AI and Data Science undergraduate with hands-on experience in Machine Learning, Neural Networks, and Full-Stack Web Development. Proven ability to design and implement scalable web applications and AI-driven analytical systems through academic and hackathon projects. Strong foundation in Python, Java, SQL, and modern development tools. Passionate about solving real-world problems using data-driven and intelligent systems.

EDUCATION

- **Bachelor of Technology – Artificial Intelligence and Data Science** 2023 – 2027
Sri Venkateswara College of Engineering (SVCE), Chennai
- **Higher Secondary Education** 2021 – 2023
Kendriya Vidyalaya

PROJECT EXPERIENCE

- **EcoDrive – AI-Based Eco-Driving Android Application**
Real-time eco-driving monitoring system using on-device machine learning and sensor analytics.
 - Developed an Android application using Kotlin and Jetpack Compose to track GPS and accelerometer data in real time.
 - Integrated a TensorFlow Lite model for on-device eco-score prediction with feature normalization.
 - Implemented fuel consumption and CO₂ emission estimation based on driving behavior analytics.
 - Designed an interactive dashboard with live map tracking and performance-based driving insights.
 - Tech Stack: Kotlin, Jetpack Compose, TensorFlow Lite, Android Studio.
- **SandScope – AI-Based Shore Analysis System**
ML model for sand grain size analysis and environmental beach monitoring. (SIH '25)
 - Developed and trained a machine learning model to analyze sand grain size using image inputs.
 - Contributed to predictive and real-time environmental monitoring of beach shores.
 - Collaborated with hardware team to integrate ML model with real-world sensing device.
 - Focused on improving model accuracy and deployment feasibility.
- **MineSentinel – Mining Compliance Monitoring System**
Automated safety compliance and hazard detection for mining environments.
 - Integrated hardware components for automated safety compliance checking in mining environments.
 - Contributed to system architecture ensuring real-time monitoring of workers and safety parameters.
 - Supported development of intelligent automation workflow for hazard detection.

TECHNICAL SKILLS AND INTERESTS

Programming Languages: Python, Java, C, C++, SQL, Dart, Kotlin

App Development: Android Studio, Flutter

Databases & Backend: Supabase, MongoDB

AI/ML Concepts: Neural Networks, Transformer-based NLP, Diffusion Models

Tools: Figma, Blender, Unity, Adobe Creative Suite, Canva, Git, GitHub

Areas of Interest: Machine Learning, Data Science, Neural Networks, Android Development

ACHIEVEMENTS

- **3rd Place – Project Presentation, UPAGRAHA'26** (National level technical Symposium), SVCE 2026
 - Designed and presented a VR-based Disaster Management Simulator integrated with Blockchain for tamper-proof data logging.
 - Demonstrated real-time simulation workflow and articulated system architecture, AI integration, and secure data storage mechanisms.
- **Runners-Up – Analytical Showdown 4.0, SVCE** 2026
 - Analyzed and engineered features from a complex Airbnb dataset under competitive time constraints.
 - Built and deployed an XGBoost (XGBClassifier) model; conducted feature importance analysis to derive actionable business insights.
- **Selected Participant – Smart India Hackathon (SIH '25), SVCE** 2025
 - Successfully trained and demonstrated an ML model for sand grain size classification under a competitive environment.

CERTIFICATIONS

- **Transformer-Based NLP – NVIDIA**
- **Snowflake Cloud Data Platform – Coursera**
- **Oracle Cloud Infrastructure – Oracle**
