ABOUT ME

Artificial Intelligence and Data Science student with strong foundations in SQL, IoT, and Operating Systems. Passionate about solving real-world problems through technology, with hands-on experience in hackathons and research-driven development.

EXPERIENCE

Augmented Reality & Virtual Reality Intern — Vyvoxel

July 2026 – Present

- Contributing to immersive AR/VR training and simulation projects; applying Unity fundamentals — Scenes, Prefabs, and Physics — for interactive 3D environments.
- Gained hands-on experience with first-person controller setup and collaborated with the team to understand AR/VR development workflows.

TECHNICAL PROJECTS

Smart Wedding Management System — Personal Project

- Designed an IoT-powered intelligent venue management system to streamline logistics at large-scale wedding events, reducing manual coordination effort.
- Automated room allocation and parking slot management using sensor-driven occupancy data, ensuring efficient use of venue space.
- Integrated a built-in SOS emergency alert system to enable immediate safety response for guests and staff during events.
- Implemented real-time people counting to provide an exact headcount per venue zone, supporting crowd management and safety planning.

EduGram — Smart Education Platform — Smart India Hackathon 2025

- Built an AI-optimised, offline-first learning platform for rural colleges to address unreliable internet access and limited bandwidth.
- Developed an audio-first learning experience with adaptive compression supporting bandwidths under 100 kbps.
- Enabled fully offline interactive modules with P2P mesh networking over Bluetooth/WiFi, allowing students to share data without internet access.
- Integrated an AI Chat Assistant for content compression, regional language translation, and real-time doubt solving.
- Implemented chunk-based video downloads so students fetch only the specific segments they need instead of entire files, saving data.
- Stack: Next.js, React, Flutter, WebRTC, Node.js, PostgreSQL, Redis, Docker, GitHub Actions.

EDUCATION

Sri Venkateswara College of Engineering (SVCE), Chennai — B.E. Artificial Intelligence & Data Science | CGPA: 7.36

2023 – 2027

Higher Secondary Education — CBSE Board | Percentage: 72%

CERTIFICATIONS

- NPTEL Elite — Cloud Computing (IIT / NPTEL)
- NPTEL Certification — Advanced Distribution Systems (IIT / NPTEL)

TECHNICAL SKILLS

Programming: C, C++, Java

Web: HTML, CSS, JavaScript, Full Stack Development

AI / ML: Machine Learning Fundamentals, Data Analysis

Embedded / IoT: Arduino, IoT Sensors, LoRa Communication

Soft Skills: Leadership, Teamwork, Time Management, Problem Solving

HACKATHONS & EVENTS

- Smart India Hackathon (SIH) Internal Hackathon — advanced to the Top 30 teams, competing on solving real-world problems with technology-driven proposals.
- Participated in Technatox, a technical fest at Prathyusha College of Engineering, engaging in competitive technical events.
- Presented research work at Student Research Day, showcasing project outcomes and technical findings to peers and faculty.

COMMUNITY & CAMPUS LEADERSHIP

- Vice Chairperson — ACM-W (Association for Computing Machinery – Women)
- Events Member — Speakers Forum | CARE Club Community Design Team
- Student Representative — Department Representative
