

SANJAY JOSHUA

puzhuthivakkam,chennai 7305764336 • sharanofficial2686@gmail.com • linkedin.com/in/sanjay-joshua github.com/sjoshua06

PROFILE

Motivated CSE student passionate about Machine Learning, Deep Learning, and Data Analytics, with a growing interest in Backend Development. Focused on creating scalable, data-driven applications.

EDUCATION

Sri Venkateshwara College of Engineering | Sep 2024 - Present

Bachelor of Engineering - Computer Science and Engineering • 3rd Year CGPA: 8.46

EXPERIENCE

Full-Stack Development Intern — Copper Hawk Technologies Jun 2026

- Built a web application enabling users to share their business cards digitally.

PROJECTS

Supply Shield: AI-Powered Supply Chain Risk Intelligence & Inventory Orchestration Platform

- Built a full-stack platform using FastAPI and React for automated supply chain risk analysis.
- Implemented Prophet-based forecasting for 90-day inventory prediction and stockout detection.
- Developed FAISS-based semantic search for BOM component matching.
- Designed automated workflows using n8n and integrated Supabase (PostgreSQL + JWT) for secure data management.

Intelligent ECG Monitoring System

- Built a real-time ECG monitoring system using ESP32, AD8232, and IoT-based data transmission with signal preprocessing for accurate analysis.
- Developed a CNN-based deep learning model for multiclass cardiac disease classification (MI, CD, STTC).
- Created a React + FastAPI dashboard to deliver real-time ECG insights and AI-driven diagnostic results.

VoagePose: Smart Itinerary Planner

- Built a full-stack platform using Next.js, React, and Firebase with secure authentication and offline-first data handling.
- Integrated an AI travel assistant for personalized recommendations and automated itinerary generation.
- Developed a sustainability engine with Recharts and added features like weather and currency integration for real-time travel insights.

AIM_EVADE

- Designed an AI-driven system to detect incoming missiles and predict trajectories using real-time simulation data.
- Developed a custom OpenAI Gym environment and trained an RL agent using PPO (Stable Baselines3) for evasive maneuvering.

SKILLS

Languages: Python, C, C++, Java

Libraries/Frameworks: Scikit-learn, TensorFlow, Pandas, Matplotlib, FastAPI

Databases: Firebase, Supabase, MySQL

Tools: Git, GitHub, n8n

CERTIFICATIONS

- IBM SkillsBuild — Machine Learning and Deep Learning
- MongoDB — MongoDB Basics for Students
- Infosys Springboard — Software Design and Development: Software Engineering & SDLC Phases
- Infosys Springboard — C++ Fundamentals
- Infosys Springboard — Programming in C

AWARDS

- Received Special Mention for SupplyShield at DSC Blueprints'26, a National-Level 24-Hour Hackathon.
- Secured 3rd Place for Intelligent ECG Monitoring System at Interrupt'26, a National-Level Symposium by Dept of CSE, SVCE.
- Secured 3rd Place for AIM-EVADE at Student Research Day 2025.
